WORK EXPERIENCE

Junior Software Developer
Konnectify | Oct 2021 to 2022

Worked as a frontend developer for Freshwork projects and had hands on experience with api.

CERTIFICATION

Completed Zen Full Stack Development Course in Guvi.

PROJECTS

Zen Clone
This project is a creation of guvi zen student dashboard using react and NodeJS, mongo db with register and login functionality.

Shopping Cart
This project helps to add and also remove the item from the cart. It also shows the total amount of the product. It is done by using redux.

Formik Crud Operation
This project displays list of books where we can able to add, edit or delete the book.

Navigation
This is a navigation project of guvi website using React router dom.

Book Filter
This project displays the book by fetching the data from api and search filter helps to filter the book we want.

Notes App
This project has login and sign-up authentication. This note app allows us to create and delete the notes.
